

# Flerov Laboratory of Nuclear Reactions

Alexander Karpov

# **FLNR's Basic Directions of Research**

## **1. Heavy and superheavy nuclei:**

- synthesis and study of properties of superheavy elements;
- chemistry of new elements;
- fusion-fission and multi-nucleon transfer reactions;
- nuclear-, mass-, & laser-spectrometry of SH nuclei.

## **2. Light exotic nuclei:**

- properties and structure of light exotic nuclei;
- reactions with exotic nuclei.

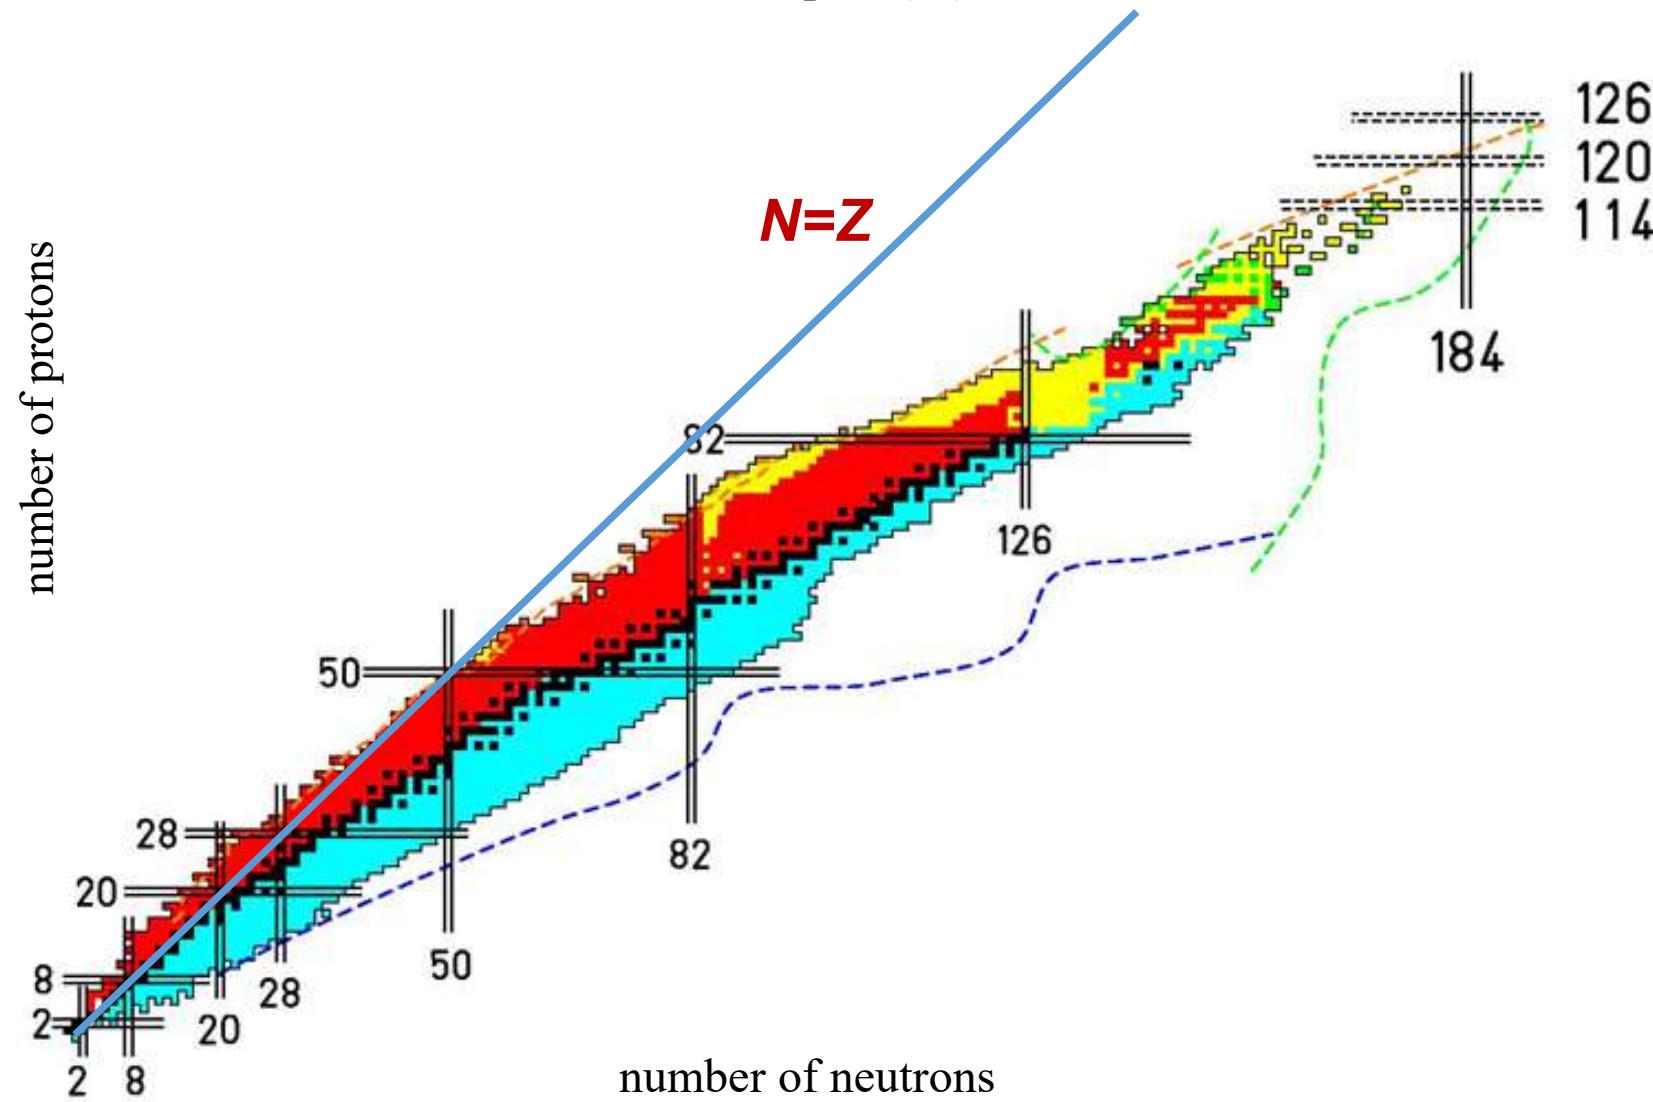

## **3. Radiation effects and physical groundwork of nanotechnology.**

## **4. Accelerator technologies.**

**Staff :** ~450 people

# Chart of nuclei

- stable
- beta-minus ( $\beta^-$ )
- beta-plus ( $\beta^+$ )
- alpha decay ( $\alpha$ )
- spontaneous fission

# Chart of Nuclei

## Synthesis of SHE with accelerators

- 1971; Orce, France:

- 1971; Dubna:  $^{208}\text{Pb} + ^{70}\text{Zn} \rightarrow ^{276}112 + 2\text{n}$ ;  $\sigma_{2\text{n}} < 0.1 \text{ mb} !!!$   
(1996, GSI, Germany);

- 1971-1975; Dubna:  $^{76}\text{Ge}$ ,  $^{136}\text{Xe} + ^{238}\text{U}$ ;

- 1975; Dubna:  $^{48}\text{Ca} + \text{Actinides}$ :

## Questions:

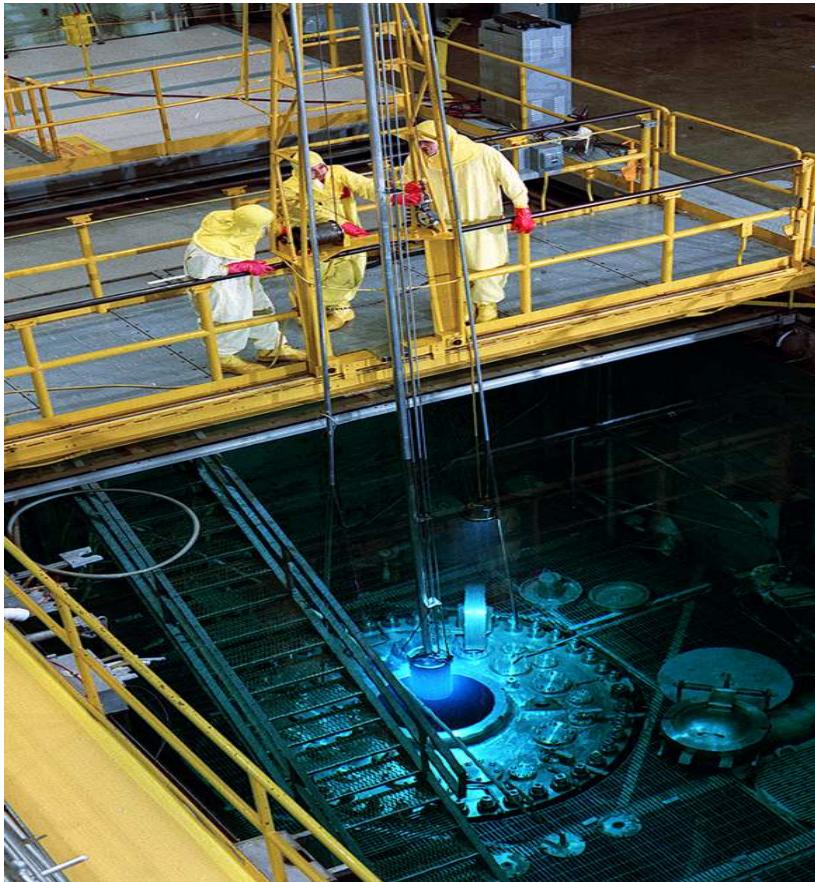

- Do SHE exist?
- Where is the region of SHE?
- How can SHE be synthesized?
- Do long-living SHE exist?
- Can SHE be produced in nature?

## Why SHE are interesting?

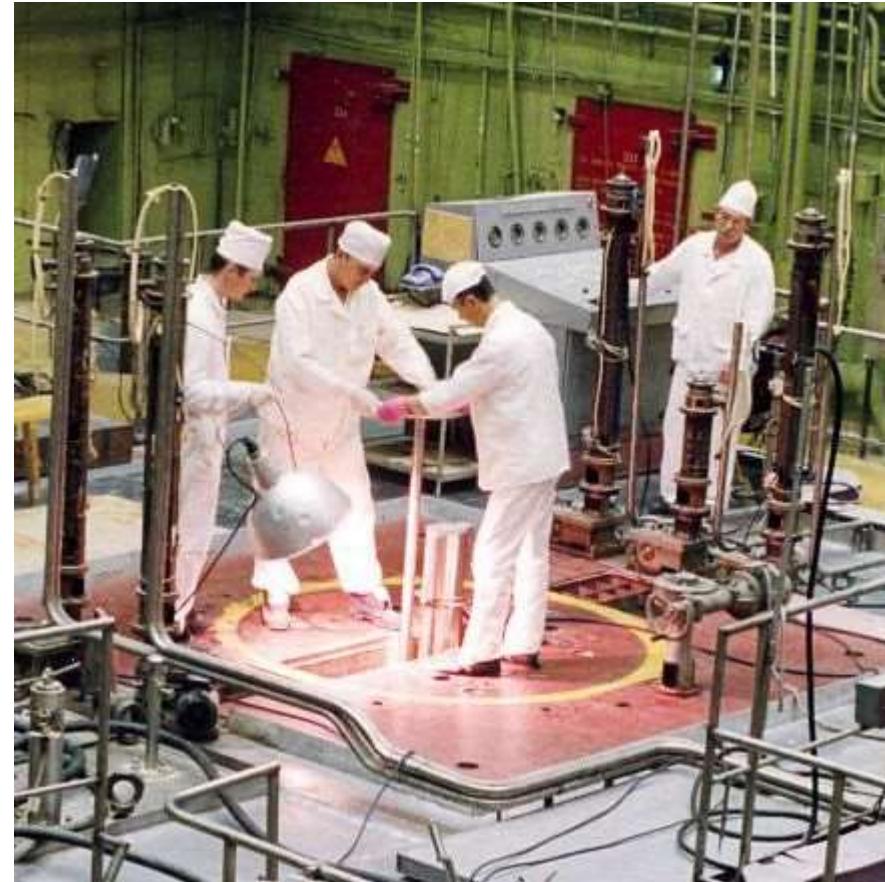

- Nuclear physics;
- Electrodynamics of superstrong fields;
- Atomic physics;
- Relativistic chemistry;
- Astrophysical nucleosynthesis;
- ...
- Can be easily understood by taxpayers.

# Isotope reactors

**HFIR, ORNL, Oak Ridge, USA, 85 MW**

International Union of Pure  
and Applied Chemistry

**May 2012:**

Official approval of the name *Flerovium* for element 114  
and the name *Livermorium* for element 116

**30<sup>th</sup> December 2015:**

Approval of the discovery of new elements 113, 115, 117, and 118

- element 113: RIKEN (Japan)
- elements 115 and 117: JINR (Dubna) - LLNL (USA) – ORNL (USA) collaboration
- element 118: JINR (Dubna) – LLNL collaboration.

**28<sup>th</sup> November 2016:**

IUPAC formally approved names and symbols of new elements:

**Nihonium** (Nh) for element 113,

**Moscovium** (Mc) for element 115,

**Tennessine** (Ts) for element 117, and

**Oganesson** (Og) for element 118.

Флеровий 114	Московий 115	Ливерморий 116	Тенессин 117	Оганесон 118
Fl	Mc	Lv	Ts	Og
Flerovium	Moscovium	Livermorium	Tennessee	Oganesson

*All these elements were synthesized for the first time at the U-400 accelerator complex of the Flerov Laboratory of Nuclear Reactions of JINR.*

# Questions and answers:

- Do the SHE exist? – YES!
- Does the “Island of stability” of SHE exist? – YES!
- How to synthesis SHE? –  
fusion reactions are yet the only working method
- How many new elements can be synthesized in the nearest nature –  
119?, 120?, ???
- How many elements are in Mendeleev Periodic Table of Elements? -  
???
- How to reach the center of the Island of stability? – ???
- How long do live the most stable nuclei from the Island of stability -  
???
- Can SHE be produced in nature? - ???

## Фабрика сверхтяжелых элементов

ЗАВЕРШАЕТСЯ СОЗДАНИЕ  
запуск: 2018 год

**Study of exotic nuclei  
close and beyond the nucleon stability limits**

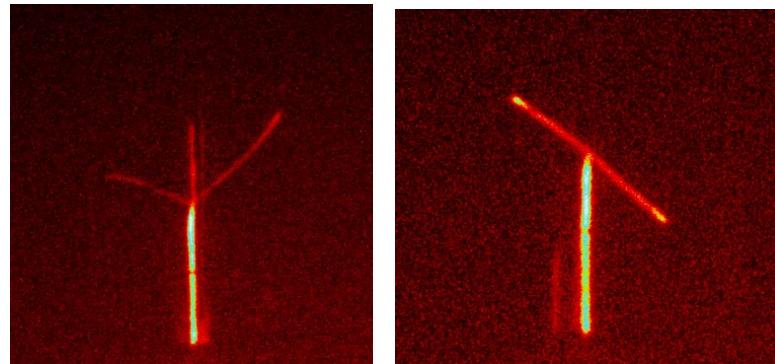

# ACCULLINA-2

New separator  
for study light exotic nuclei  
and reactions with them

**2015/16:** commissioning tests, 1<sup>st</sup> runs

**2016:** zero angle spectrometer

**2018/19:** unique cryogenic tritium target

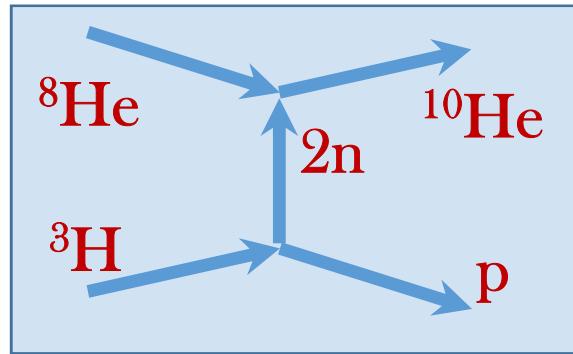

*Directions of the future researches:*

- structure of light exotic nuclei
- reactions with exotic nuclei
- study of rare decay modes

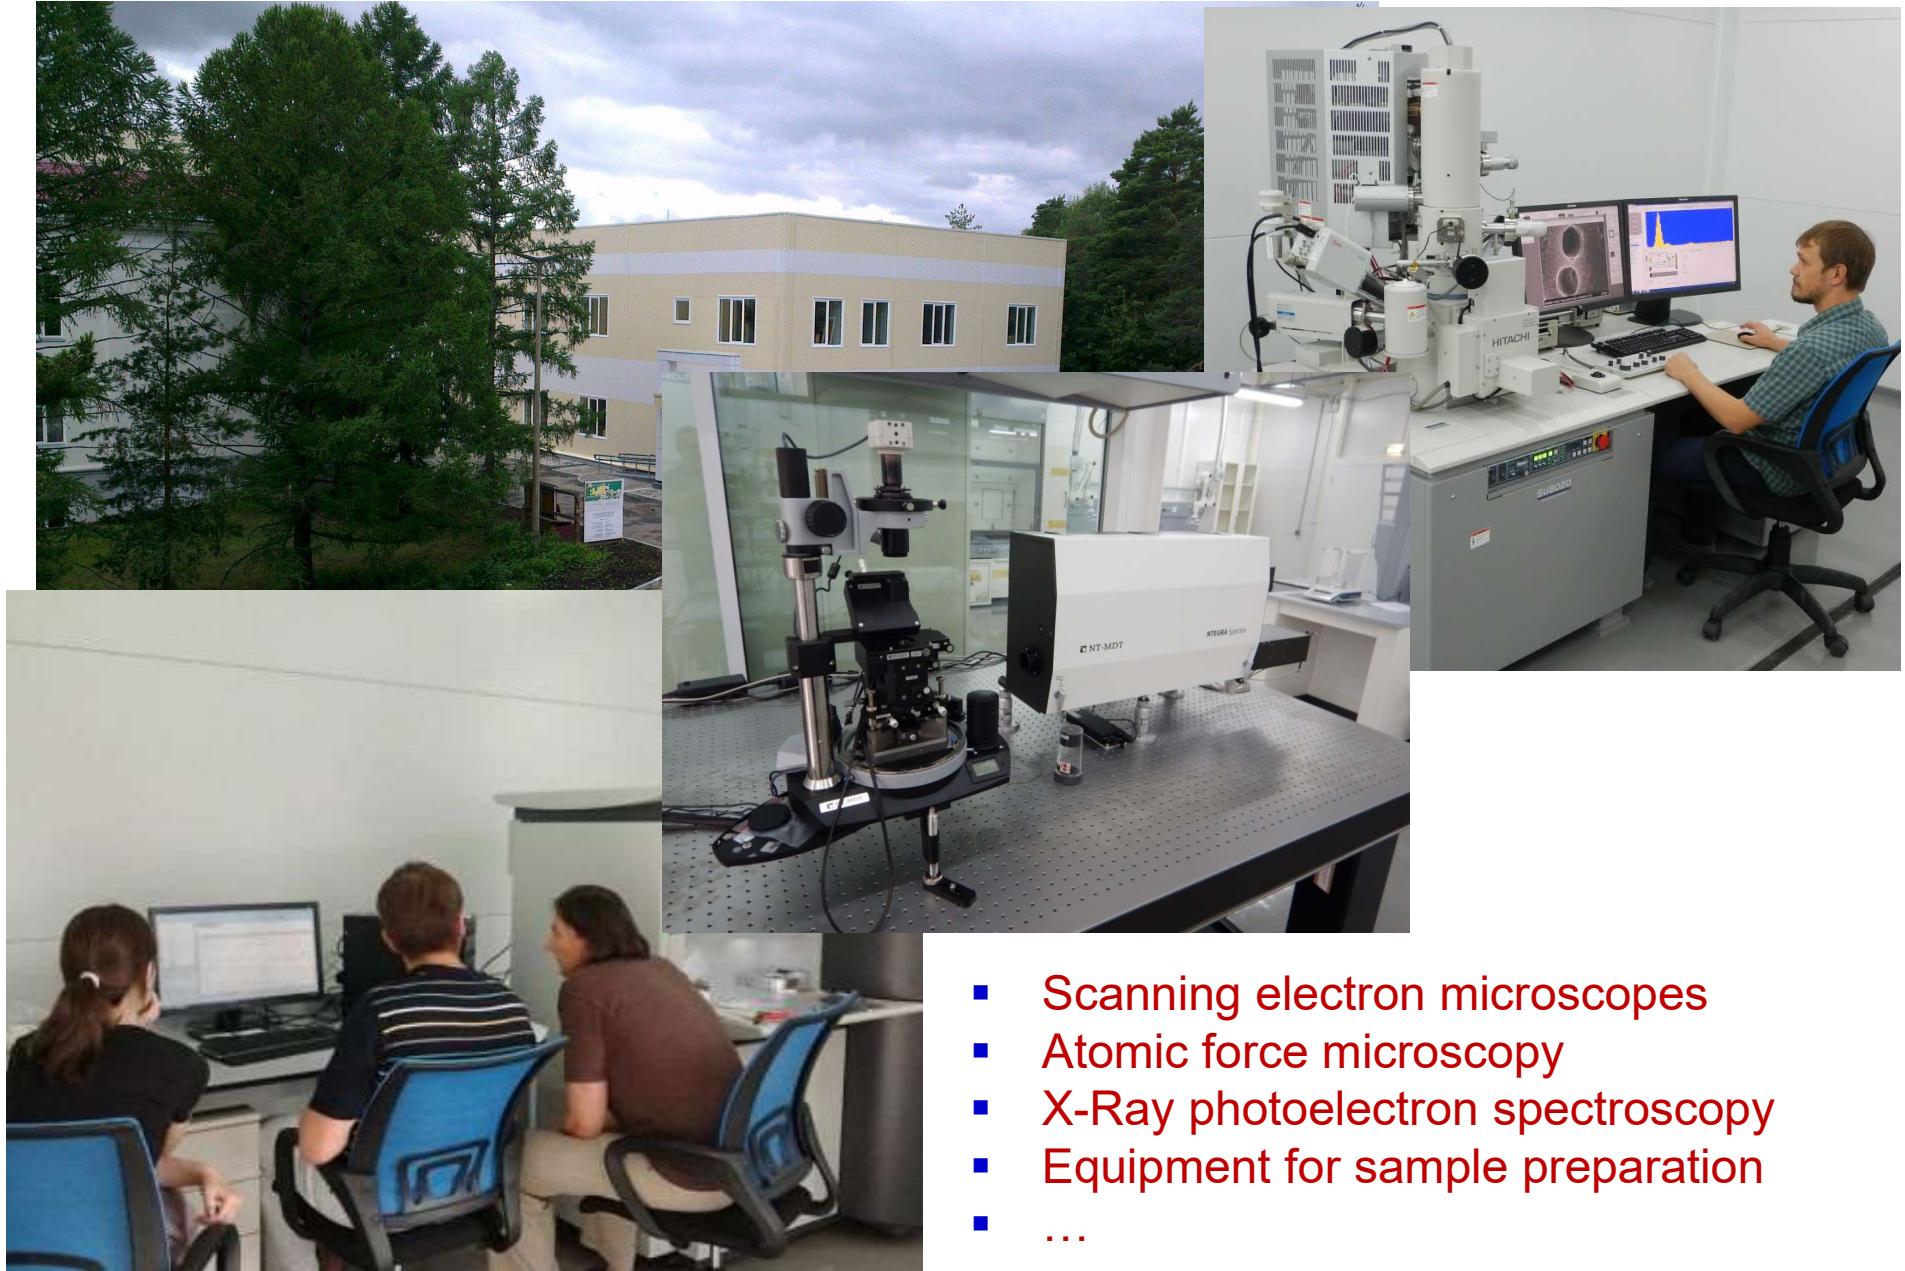

January 2015

## $^{10}\text{He}$ : 2n-transfer

# **Applied research**

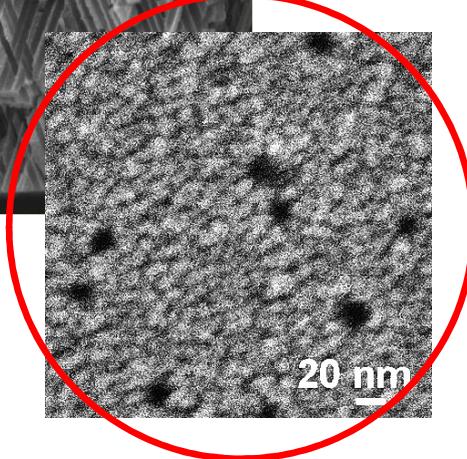

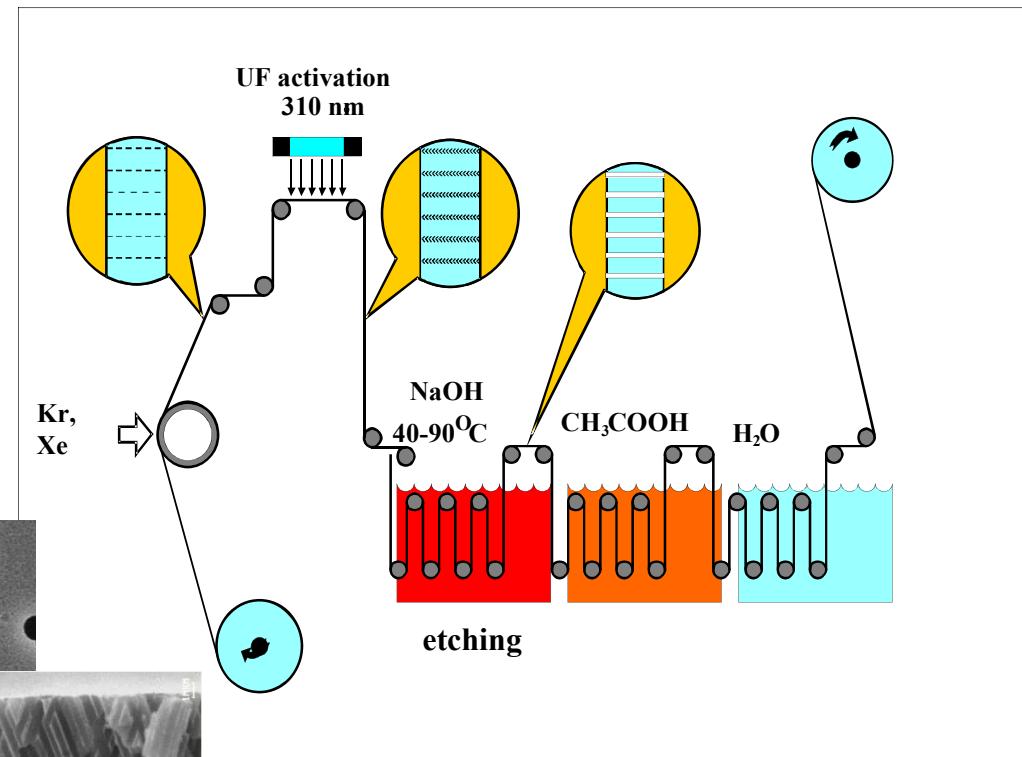

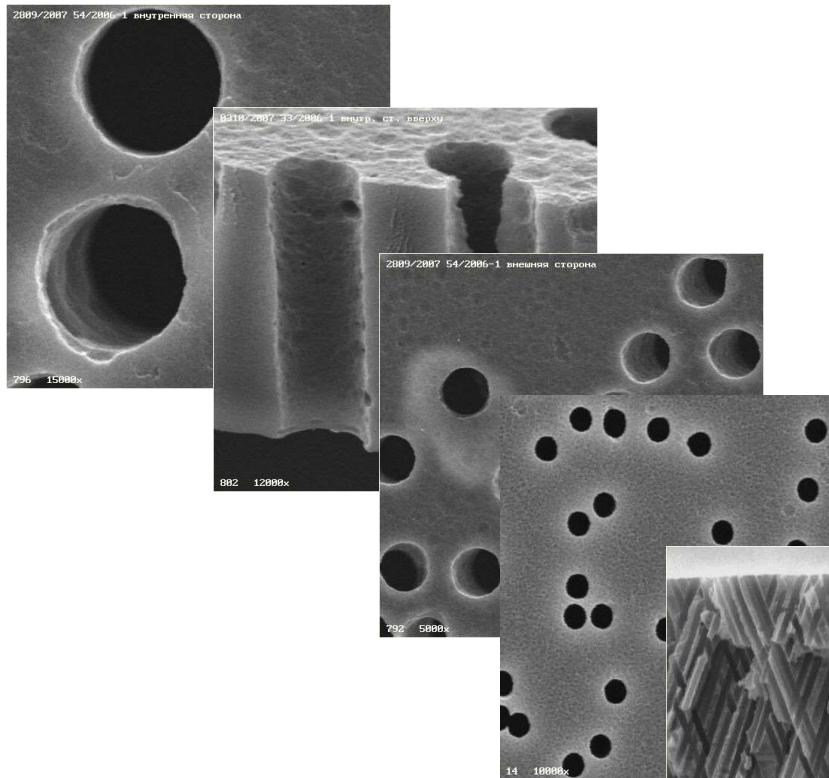

# Nano Laboratory

- Scanning electron microscopes
- Atomic force microscopy
- X-Ray photoelectron spectroscopy
- Equipment for sample preparation
- ...

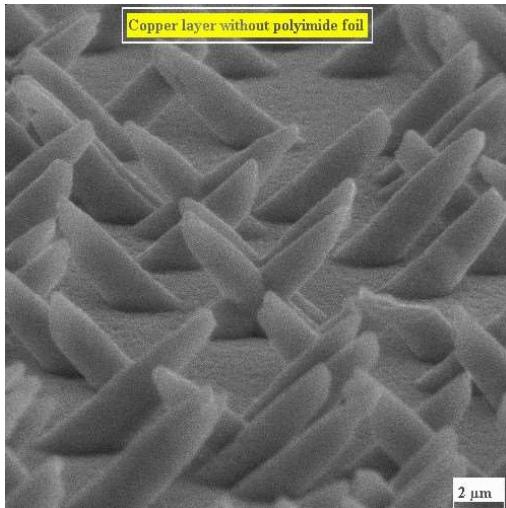

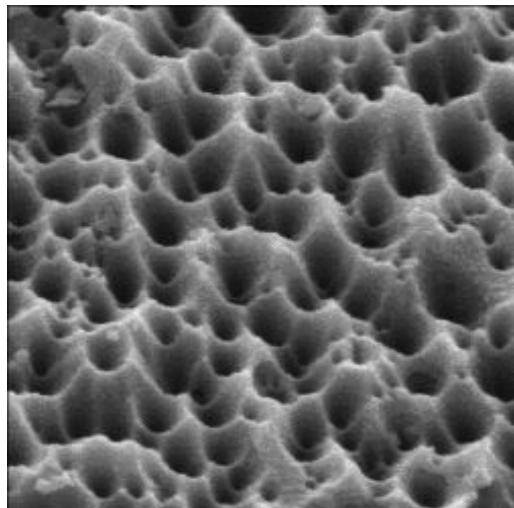

# Production of track membranes (IC-100)

Micrometers

Nanometers

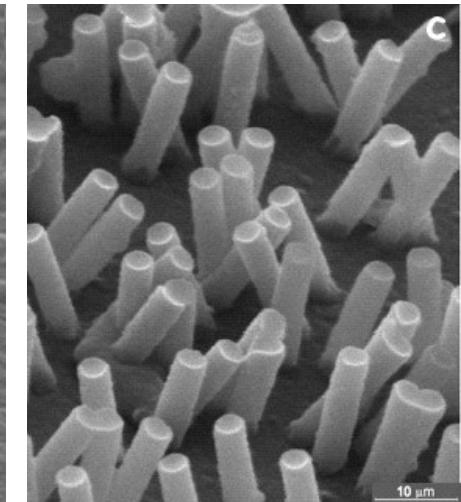

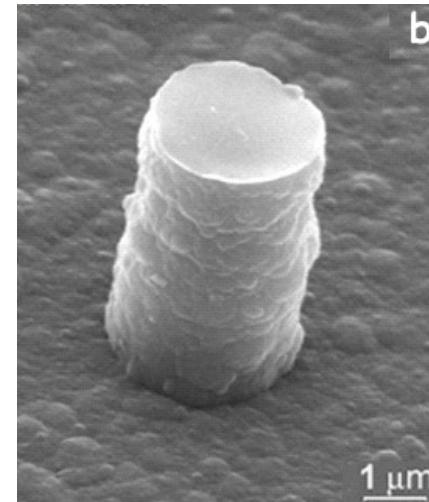

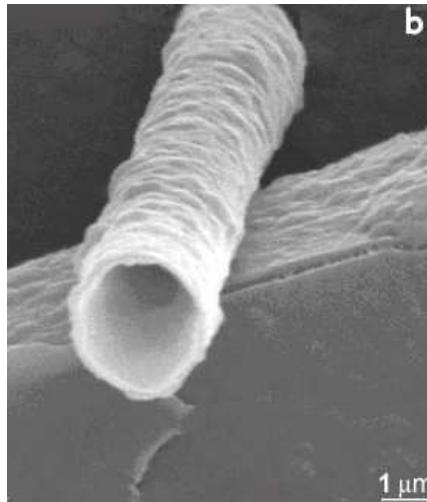

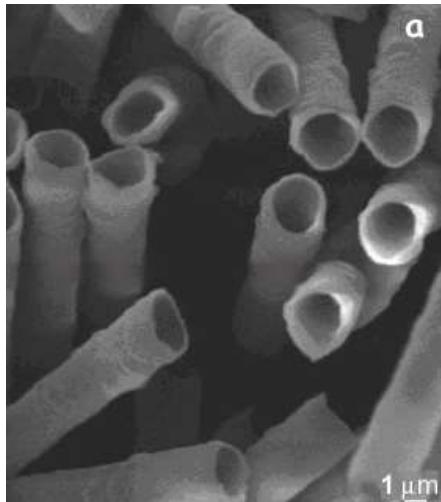

# Accelerators-born nanostructures

## *new composite materials:*

- extended layers adhesion strength
- increased thermal resistance
- flexible printed circuit boards

*Polymer composites produced with the use of track membranes*  
nanotubes

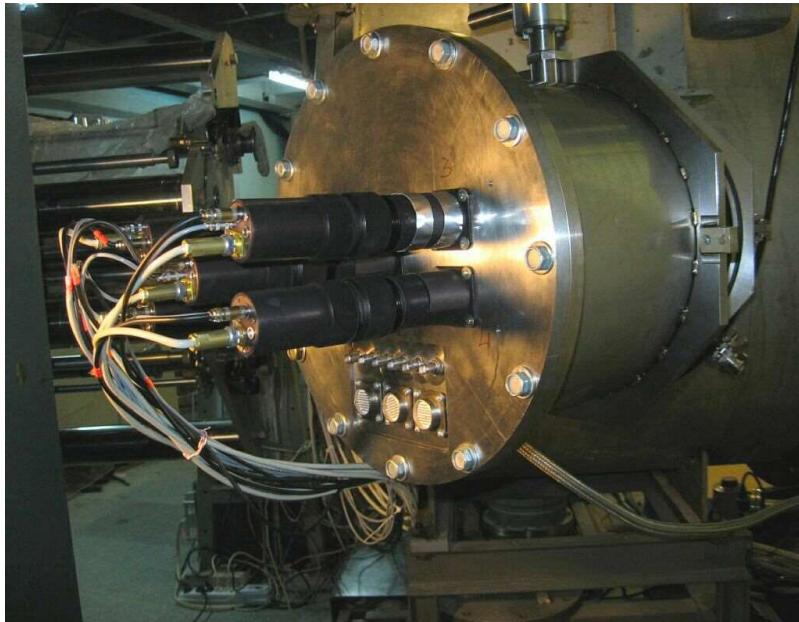

nanowires

# Radiation Hardness Tests For Electronic Components

Development of radiation-proofed electronic components is the first priority task of the modern high-class electronic industry.

Long-distance space flights, long-lived sputniks, etc. are extremely critical to the quality of electronic chips.

# Welcome to DUBNA!

Science bringing nations together
