

Production of radioactive ion beams and light exotic nuclei study at ACCULINNA2 separator

Piotr Nowak, AGH, Kraków
Oliwia Ziółkowska, PWr, Wrocław
Supervisor – dr Grzegorz Kamiński, FLNR

AIM OF OUR PROJECT

1

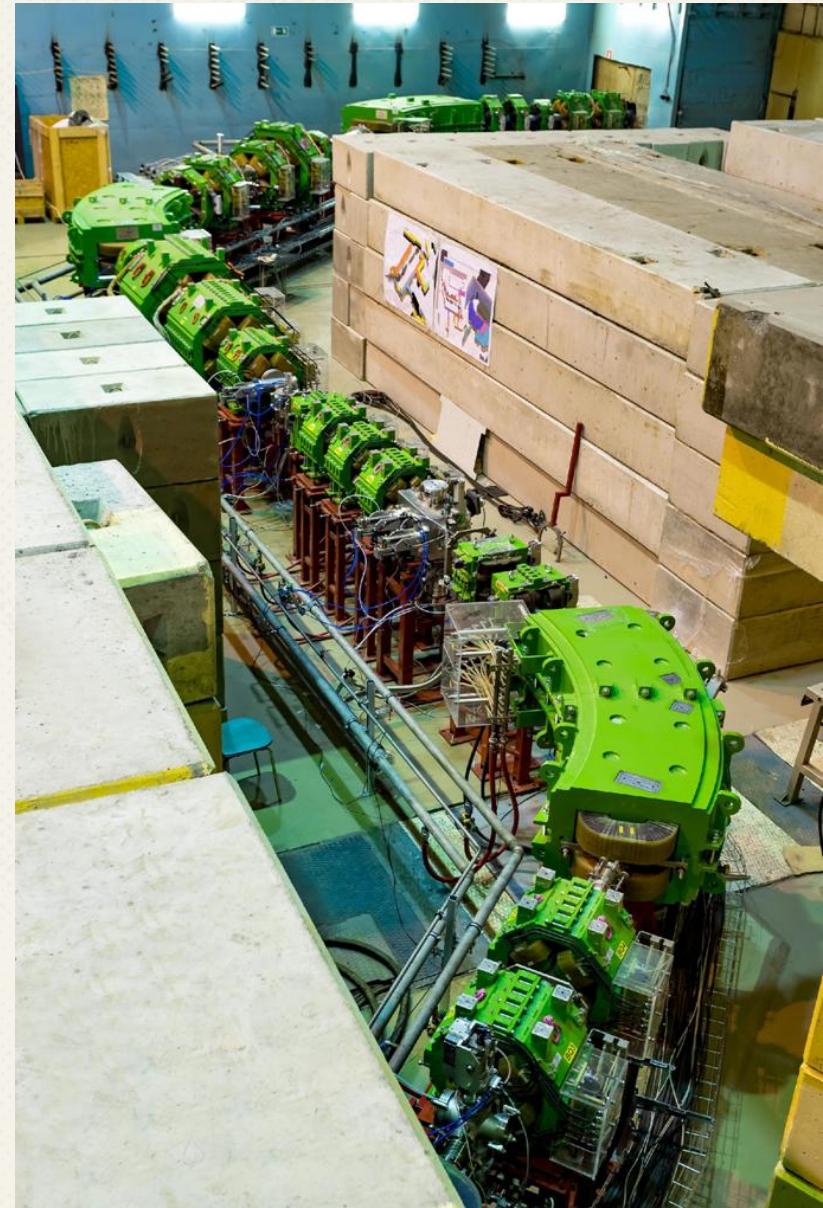

Getting familiar with
principal of operation
of ACCULINNA-1 and
ACCULINNA-2
separators.

2

Analysis of data from
the first experimental
measurement at the
ACCULINNA-2
separator.

3

Identification of the
reaction products at
experimental spectra,
performing
simulations in the
LISE++ program.
